

January 2014 - Round the Bend Farm E-Newsletter

Dear Friend,

RTB believes that *all people* deserve real food, grown in a chemical-free environment. We also believe you have the right to choose what foods you are feeding your family. Genetically modified organisms (GMOs) have the citizens of Massachusetts at a crossroad and we have until **March 19th** to let our legislators know that we want a safe and transparent food system by requiring GMO labeling of all products.

What are the effects and long-term impacts of GMOs? It may alarm you to know that this answer is unknown. GMOs are a giant food experiment, being performed on you, your family and your environment everyday by the world's largest chemical companies. You can find out more details [here](#).

Join us in supporting mandatory GMO labeling in Massachusetts by [signing the petition](#) before March 19th. Our legislators need to hear from you!

For more information and ways to help, visit www.marighttoknow.org.

With love, light and positive energy,
